

Room 8 May News

This month our themes are Eric Carle, Mother's Day, Zoo and Farm. Last month we had so much fun talking about the life cycle of a butterfly. We learned that a butterfly starts out as eggs and they hatch into caterpillars. Caterpillars eat and eat until they are big enough to hang upside down and form a chrysalis. Inside the chrysalis they go through metamorphosis and emerge as butterflies. Our class did so well learning the terminology and by the end of the month we could recite the life cycle of a butterfly.

Last month we started learning our full names. We are very proud of the progress the class has made. This month we are adding our birthdays during circle time. We started practicing last week and several of our friends already have it down.

Upcoming Events

Picture Days 5/1 & 5/2

Teacher Appreciation Week 5/6-5/10
